

Wheels India Limited

June xx, 2020

Wheels India Limited: Long-term and medium-term ratings reaffirmed and outlook remains negative; short-term rating downgraded; rated amount enhanced

Summary of rated instruments

Instrument	Previous Rated Amount (Rs. crore)	Current Rated Amount (Rs. crore)	Rating Action
Commercial Paper	100.00	100.00	[ICRA]A1; downgraded from [ICRA]A1+
Medium Term: Fixed deposit	150.00	180.00	MA+ (Negative); rating reaffirmed/assigned
Term loan	147.81	227.81	[ICRA]A+ (Negative); rating reaffirmed/assigned
Long term - Fund based facilities	260.00	260.00	[ICRA]A+ (Negative); rating reaffirmed
Long term – Unallocated	42.19	2.19	
Short term -Non-fund-based facilities	150.00	150.00	[ICRA]A1; downgraded from [ICRA]A1+
Total	850.00	920.00	

*Instrument details are provided in Annexure-1

Rationale

The downgrade on the short-term rating follows the expected weakening of Wheels India Limited's (WIL) cashflow position over the next few months because of the sharp demand contraction in the Indian and global automotive and earthmoving (EM) equipment industry following the Covid-19 pandemic. WIL's revenues have been negligible in April and May 2020 following the global lockdown of non-essential services for about two months and consequent dip in sales. Further, sales are expected to remain weak over the next 2-3 quarters. The cascading effect of all this will be a sharp fall in accruals and disruption in WIL's working capital cycle and an increasing dependence on borrowings over the next few months.

Most automotive sectors and EM equipment demand are expected to post steep double-digit declines in India and globally in FY2021. ICRA expects the Indian M&HCV (trucks) segment to decline by over 25% and Indian PV sales to decline by 22-25% in FY2021, steeper than earlier estimates. While the strength of the eventual recovery will be contingent on the duration and breadth of the pandemic before an eventual containment, a relatively prolonged period of curtailed automotive and EM equipment demand, as the consumer stays wary of large capital commitments is expected. Considering the highly uncertain nature of the pandemic, these estimates could be reviewed further in coming months.

The ratings positively factor in WIL's healthy financial flexibility by belonging to the larger TVS Group of Companies – an established name in the domestic auto ancillary industry and the T S Santhanam arm within that. The TVS Group holds 43.27% stake in WIL through TV Sundram Iyengar and Sons Private Limited (20.41%), Sunda ram Finance Limited (13.58%) and Southern Roadways Limited (9.28%). The ratings also consider the company's established position as one of the largest steel wheel rim manufacturers in the country in the automotive segment (except 2W) and globally in EM equipment, with presence of more than five decades. WIL has a diversified customer base and caters to over 30 OEMs globally. Also, products other than wheel rims, like windmill components, bogie frames and bogie bolsters, air suspension systems and a few others contributed to ~30% of its revenues in 9M FY2020 providing revenue diversification to an extent.

However, the ratings are constrained by the company's relatively high borrowings because of its continued debt-funded capex over the years and weakening of coverage metrics in 9M FY2020 because of lower operating leverage with sharp demand deterioration. The company's consolidated net debt/OPBDITA stood at 4.7x as on Dec 31, 2019 (3.4x as on Mar 31, 2019) while its interest coverage was 2.7x for 9M FY2020 (PY: 3.8x). Also, WIL has moderate operating margins at 6.5% for 9M FY2020 (PY: 7.1% for 9M FY2019) given its limited bargaining power sandwiched between OEMs and large suppliers, competitive pressures and relatively moderate value addition.

Key rating drivers and their description

Credit strengths

WIL is among the largest steel wheel rim manufacturers in India in the automotive segment and among the largest steel wheel rim manufacturers globally for EM equipment – With revenues of ~Rs. 2,083.0 crore in 9M FY2020 and over five decades of presence in the steel wheel rim industry, the company is amongst the largest manufacturers of automotive steel wheel rims in India and earth mover steel wheel rims globally. WIL enjoys a dominant domestic market share of 43% in M&HCV, 80% in LCV, 54% in tractors and 30% in passenger cars steel rims at a consolidated level.

Diversified segment and customer base; non-wheel rim business constituted over 20% of revenues in 9M FY2020 – The company derives 80% of its consolidated revenues from India while the remaining are from overseas markets. Product wise, wheels constitute ~70% of revenues, while fabricated and machined windmill components, bogie frames and bogie bolsters, air suspension systems and others constitute ~30% of revenues. Segment-wise also, WIL's revenues are fairly diversified across passenger cars (18% of revenues in 9M FY2020), commercial vehicles (15% of revenues in 9M FY2020), tractors (15% of revenues in 9M FY2020) and earthmovers (11% of revenues in 9M FY2020). Within domestic wheel rims, WIL has a diversified customer base spread across 30 OEMs. Tata Motors Limited (rated [ICRA]AA- (Negative)/[ICRA]A1+), Mahindra and Mahindra Limited (rated [ICRA]AAA (Stable)/[ICRA]A1+) and Maruti Suzuki India Limited were the top three customers accounting for 18%, 14% and 11% of consolidated revenues in 9M FY2020 respectively. The diversification mitigates risks arising from revenue decline in from any single customer/segment to an extent, although the company remains dependent on the domestic automotive market.

Financial flexibility by being part of the larger TVS Group of companies and the T S Santhanam arm within that – WIL enjoys healthy financial flexibility by belonging to the larger TVS Group of Companies – an established name in the domestic auto ancillary industry and the T S Santhanam arm within that. The TVS Group holds a 43.27% stake in the company through TV Sundram Iyengar and Sons Private Limited (20.41%, rated [ICRA]AA (Stable)/ [ICRA]A1+), Sundaram Finance Limited (13.58%, rated [ICRA]AAA (Stable)/MAAA (Stable)/[ICRA]A1+) and Southern Roadways Limited (9.28%).

Credit challenges

Sharp demand drop and revenue pressure in FY2021 due to the pandemic; expected weakening of cashflow position over the next few months – Majority of the company's revenues are derived from the domestic automotive and domestic/overseas EM equipment industries. As a result of the demand slowdown, WIL reported a revenue decline of 17.9% YoY in 9M FY2020. Going forward, the lockdown, weakening liquidity and poor consumer sentiments are expected to significantly impact revenues for the company in FY2021. As a cascading effect of weak demand, WIL is expected to have lower accruals and stretched working capital cycle, deteriorating its liquidity position over the next few months.

Relatively high debt levels; weakening of coverage metrics in 9M FY2020 – The company’s debt levels were relatively high at Rs. 871.2 crore as on Dec 31, 2019¹, contributed by continued debt-funded capex and discounting of purchase/sales bills to meet its working capital requirements. The relatively high debt levels and weaker operating leverage in 9M FY2020 (because of the demand slowdown) have resulted in deterioration in coverage metrics for the company. WIL’s consolidated net debt/OPBDITA stood at 4.7x as on Dec 31, 2019 (3.4x as on Mar 31, 2019) while its interest coverage was 2.7x for 9M FY2020 (PY: 3.8x).

Moderate operating margins – WIL has moderate operating margins at 6.5% for 9M FY2020 (PY: 7.1% for 9M FY2019) given its limited bargaining power sandwiched between OEMs and large suppliers, competitive pressures and relatively moderate value addition. Despite the lower operating margins, deferred tax reversals arising from adopting lower corporate tax rates resulted in WIL’s consolidated net margin remaining flat at 2.1% in 9M FY2020. WIL’s operating margins are likely to be impacted in Q4 FY2020 and Q1 FY2021, because of the lockdown and associated loss of sales/weaker absorption of fixed costs. While the negative operating leverage will impact margins in FY2021, the company’s cost-saving initiatives on multiple fronts are likely to lessen the margin decline.

Liquidity Position: Adequate

WIL’s liquidity is adequate with positive fund flow from operations in FY2019; consolidated cash and bank balances and liquid investments of Rs. 17.5 crore as on December 31, 2019; and undrawn lines of more than Rs. 120 crore as on date. Its average working capital utilisation was ~79.4% of drawing power and 90% of Board-approved limits as on month ends for the 16-month period ended February 2020. WIL has a Board-capped working capital limit of Rs. 260 crore², which can be modified at short notice to enable the company to borrow more if required. In relation to these sources of cash, WIL has a total consolidated capex commitment of ~Rs. 103.5 crore for FY2021 and FY2022 (to be funded through mix of debt and internal accruals), and term loan repayments of Rs. 61.3 crore and Rs. 72.7 crore respectively in FY2021 and FY2022. Overall, ICRA expects WIL to be able to meet its medium-term commitments through internal sources of cash and tied-up debt. Further, WIL enjoys strong financial flexibility and lender/investor comfort, and this is expected to continue going forward as well.

Rating sensitivities

Positive triggers – An upgrade is unlikely in the near term, given the negative outlook on the auto component and construction equipment industries owing to the macroeconomic slowdown triggered by the pandemic. Nonetheless, the outlook may be revised to ‘stable’ upon sustained improvement in its credit profile through improvement in profit margins and leverage metrics.

Negative triggers – Negative pressure on WIL’s rating could arise from prolonged impact of the pandemic leading to weak performance and deterioration in liquidity or leverage metrics.
